## Contested bidding

### 2.1 1♣

1♣-(DBL)

P=Not enough to force to game  
RDBL=willingness to penalize opponents, FP to 2NT  
1♦=FG with less than 5 zz  
1♥+=As uncontested

1♣-(1♦)

1♠+=As uncontested

1♣-(Higher)

Pass=Not enough to force to game  
DBL=FG, type of T/O, normally balanced/semibalanced  
New suit=Game forcing and 5+suit  
NT-bid=Nat  
Cue="perfect T/O" promises 4 in all unbid M's, 0-1 in ES.

If you open 1♣ and partner passed after overcall or he responded 1♦ and RHO overcalls we play our defensive methods with the exception that 1♣-(1M)-p-(2M)-2NT=Nat about 18-21.

If OPPT contest after 1♣-(Bid)-1♥+ or 1♣-(p)-1♥+ directly or later in the bidding we still keep our relays if we can. That is if OPP's don't bid more than 2 steps higher than last bid. If we can save space thanks to this we do so. If they bid more than 2 steps relay is out and we bid NAT.

## More about our leads against NT

- 4.1 Sometimes we can't afford to lead the 3<sup>rd</sup> from 4 because we are afraid it will cost a trick, then we lead our 4<sup>th</sup>. For example AT8x or KJ92.

We have one more exception when we don't lead according to 3<sup>rd</sup>/LOW. That is after 3NT gambling and situations similar to gambling (cashing situations). Then we lead our spot cards as normal but T-A according to Rusinow. Examples are, 3NT opening (gambling), 3m-3NT.

## More about our psychics

- 5.1 We do not psych often but it comes up every now and then. We have no agreement when or how we psyche or not (i.e. no standardised positions). However the times it has happened there are usually been a fairly low gamble psych from our side. Usually we had somewhere to run, either long support for one of partner's suits or a long suit of our own.
